## PROFILE

Results-driven Full-Stack Developer with over 5 years of professional experience specialising in the MERN stack and mobile application development using React Native. Proven track record of designing, developing, and deploying robust applications to both the Apple App Store and Google Play Store.

Skilled in building scalable backend systems using Node.js, Express.js, and MongoDB, with hands-on experience leveraging AWS services for cloud deployment and infrastructure management. Adept at integrating a wide range of third-party services, including Stripe, Google APIs, Firebase, and authentication systems.

Additionally experienced in blockchain development, including smart contract integration and decentralised application (dApp) architecture. Capable of managing full product lifecycles, delivering secure, high-performance solutions across both web and mobile platforms.

## WORK EXPERIENCE

**Nova**

2018 - 2024

React- Native Developer

- Developed mobile apps for Nova Company using React Native for Android and iOS.
- Led end-to-end development with a focus on UI/UX, API integration, and backend connectivity.
- Collaborated with product and design teams to align app functionality with business goals, managing App Store and Google Play deployments.
- Created custom admin dashboards using React.js and Node.js for real-time data access and content management.

**Codebusterspro**

2018 - 2022

React Native and Deployment Manager

- Developed cross-platform mobile apps for Android and iOS with React Native, managing the entire app lifecycle.
- Created custom admin panels using React, Next.js, or Express.js for real-time content management and analytics.
- Provided end-to-end solutions by designing frontend interfaces and backend architectures, including API development and cloud deployment.

## EDUCATION

**Bachelors In Computer Science**

2014 - 2018

Hamdard University
